Instruction During Extended Learning

During the extended closure, instruction will occur asynchronously and through Office hours/Small groups.

Asynchronous learning - is student-centered instruction where students engage with pre-recorded video lessons, assignments, and other learning tasks on their own and instruction is not being delivered in person or in real-time. This will be the primary instructional delivery method for Derry Area High School so that families can manage learning around their schedules and to minimize the stress on Internet connectivity.

Office hours/Small groups - are times when teachers will be available to assist small groups or individual students, answer questions, and provide additional help in a real-time manner.
